

## QA Manager - IT - Larnaca – Cyprus – AP14923

Are you an enthusiastic individual looking for the next opportunity in IT? Are you seeking to work in a dynamic, challenging and innovative yet friendly and supportive environment with excellent potential to growth? If yes, apply now! We are seeking to recruit a QA Manager on behalf of our client, a multinational company that specialises in security and safety technologies.

### THE MAIN DUTIES WITHIN THE ROLE WILL BE:

- The QA Manager will be required to manage the complete QA life cycle of new versions for existing system, currently under extensive development of new features, modules and sub-systems
- The QA Manager will be required to communicate the system analyst and other positions on respect with the requirements, as well as with the development team as part of the testing process
- The QA Manager will define the required QA staff and manage the recruitment and placement process
- The QA Manager will define and deploy the required tools for accommodating efficient and accurate test process, including test automation tools
- The QA Manager will report to the Development Manager

### WE ARE LOOKING FOR A CANDIDATE WITH THE FOLLOWING SKILLS:

- Familiar with common methodologies and practice of large, distributed, enterprise scale application testing
- Understanding of web application general architecture
- Ability to create and run SQL queries as part of the testing process
- Ability to read and use UML based requirement documents
- Experience with common tools for the following tasks: Standalone application testing automation, web application testing automation, web application load tests
- Excellent verbal and written communication, both with technical staff and business positions
