

JAVA DEVELOPER - IT - LIMASSOL – CYPRUS - AP15104

We are currently seeking a Java Developer to join our client, a growing international company.

As a Java Developer you must have a thorough and logical way of approaching problems along with having exceptional attention to detail. To be considered as a candidate you must always be prepared to respond and resolve any relevant issues that are related to the production Data Warehouse at any levels of the organization.

As a Java Developer, you will be a part of a talented software team that works on mission-critical application. You will become accountable for Java/ Java EE application development while providing expertise in the full software development lifecycle that will include in creating a theory, designing and being able to test the software until it meets the company's standards.

THE MAIN DUTIES WITHIN THE ROLE WILL BE:

- Design and develop high-volume, low-latency applications for mission-critical systems, delivering high-availability and performance.
- Write well designed, testable, and efficient codes.
- Support in continuous improvement by investigating alternatives and presenting these for architectural review.
- Maintains links to external sites and accuracy on internal links while ensuring up-to-date information.
- Develop Applications using spring MVC framework with the given development specifications
- Connecting to and Running ad hoc queries against Oracle , SQL Server and MySQL Databases
- Create goals and guidelines for system-wide performance and infrastructure usage, establishing performance baselines and management of any deviations.
- Leads architecture discussions around design, data integration, recoverability and resiliency and leads complex discussions with users on large database designs
- The ability to work in a complex Oracle RAC environment hosted on a Linux OS platform
- Contribute in all phases of the development lifecycle

REQUIREMENTS:

- BS/MS degree in Computer Science, Engineering or a related subject
- 5-6 years of hands on Software Development experience
- 4-6 years of experience in Java/J2EE development and programming
- Deep understanding of PL/SQL and SQL usage
- Hands on experience in designing and developing applications using Java EE platforms
- Object Oriented analysis and design using common design patterns.
- Profound insight of Java and JEE internals (Classloading, Memory Management, Transaction management etc)
- Excellent knowledge of Relational Databases, SQL and ORM technologies (JPA2, Hibernate)
- Strong knowledge on JSP, Servlets, JSF, Spring Framework, Spring MVC and Struts, etc.
- Experience with test-driven development
- Experience in developing web applications using at least one popular web framework (JSF, Wicket, GWT, Spring MVC)
- Have strong communication skills and leadership skills, willing to adapt and learn new technology and be a part of changing culture
- Knowledge on deployment of web applications.
- Experienced working for a financial services company is a plus.
- Detailed oriented, analytical mindset, highly effective at decision making

Due to the high volume of applications we receive, only shortlisted candidates will be responded to.
