

**UI/UX WEB DESIGNER - IT - LIMASSOL – CYPRUS - AP15107**

We are currently seeking a UI/UX Web Designer to join our client, a growing international company.

To be considered for the UX/UI designer role, we are looking for a candidate who is a talented designer that has a passion for creating visuals. In this specific position you will be working closely with our engineering and management team and together, you will design, test and iterate the look and feel of the new features while meeting the standards of our company.

As a UX/UI designer, you should be able to apply your skills to enhance and enrich the user experience for our company and clients. The ideal candidate will demonstrate passion in creating new products while aiming to create an intuitive and modern design. The designer will be expected to apply and design methodologies in order to successfully develop graphics and properly structuring the layout. It is crucial that you are able to display excellent verbal and written communication skills. As a UX/UI designer you are expected to have attributes that allow you to have flexibility, adapt to quick changes, and to learn quickly in your surrounding environments. You are expected to solve problems in a creative manner that is efficient. It is crucial that you are able to display excellent verbal and written communication skills.

**THE MAIN DUTIES WITHIN THE ROLE WILL BE:**

- Create and review new pages to ensure they fit overall site design and usability criteria
- Create interaction models, mockups, wireframes, and layouts that promote ease of use and optimize how customers interact with all new products and features
- Prepare prototypes for the new product applications and features
- Analyze analytics and qualitative data from user research and iterate until the product meets standards
- Able to work with web-based technologies, including HTML code, CSS layout, PHP, Javascript/jQuery along with content management
- Capable of programming and working with APIs and Web Services
- Understand HTML/CSS, bootstrap, javascript, responsive, and mobile with direct experience optimizing design concepts around these technologies
- Work with Adobe products such as: Photoshop, Fireworks, Illustrator
- Capability to create wireframes and mockups
- Able to maintain attention to detail while working in a fast-paced environment
- Think creatively and justify concepts

**REQUIREMENTS:**

- Bachelor's degree in fine/ graphic arts or design (or comparable field of study)
- 3-5+ of professional experience in interface design and/or user research
- Portfolio that demonstrates previous works-samples
- Strong background in UX/UI design, methodologies and development
- Experienced in web-based technologies, including HTML code, CSS layout, PHP, JavaScript/jQuery
- Knowledge in programming and working with APIs and Web Services
- Has strong skills in working with Adobe products such as: Photoshop, Fireworks, Illustrator
- Must be able to deliver high quality work across multiple projects consistently on time.
- Excellent verbal and written communication for all levels of the organization required.

Due to the high volume of applications we receive, only shortlisted candidates will be responded to.
