

DevOps Engineer

Reference Number: DOE1019

The position:

We are looking for an experienced DevOps Engineer to join our IT team in Cyprus.

The key responsibilities of the role include:

- Initiating and actively driving the adoption of good patterns, structures and use of technologies for development and operations
- Investigating and identifying practices and work that can benefit from automation
- Monitoring and suggesting improvements to the existing CI/CD process to increase speed, safety and reliability
- Implementing and/or coordinating the implementation with the parties involved
- Developing and maintaining existing Jenkins/GitLab CI pipelines libraries
- Assisting developers with setting up CI/CD for their projects and providing support for any issues that may arise
- Executing/coordinating administration tasks for the internal Jenkins, Gitlab and Nexus systems
- Keeping up to date with the latest tools and trends in the industry

Main requirements:

- University degree in Computer Science, Engineering or a similar discipline
- Overall knowledge of software dev and release practices according to DevOps principles
- Experience in Jenkins pipelines development and/or GitLab pipelines development
- Administration experience with Jenkins, GitLab, Nexus
- Knowledge of Ansible or other configuration management tools
- Basic Linux and Windows admin skills, networking, scripting, build tools such as Maven or Gradle
- Knowledge of cloud technologies such as AWS, Docker, Kubernetes, Terraform, Packer will be considered an advantage
- Experience with monitoring tools (e.g. Zabbix, New Relic) will be considered an advantage

Benefit from:

- Attractive remuneration package plus performance related reward
- Private health insurance
- Corporate pension fund
- Intellectually stimulating work environment
- Continuous personal development and international training opportunities

Type of employment: Full time

Location: Limassol, Cyprus
