

Database Administrator - Limassol

Reference Number: DBA1120

The key responsibilities of the role include:

- Managing databases on premises, as well as in cloud (i.e. daily support, performance improvements, backups and replication)
- Handling migration of large data sets between databases
- Providing technical direction and guidance toward DB configuration
- Effectively collaborating with all the departments to achieve operational and project goals
- Working with the information security team to maintain security, access rights and compliance of the databases
- Recommending and implementing emerging database technologies

Main requirements:

- BSc/MSc in Information Technology or any other relevant field
- Minimum 2 years' experience in a similar position, preferably in the financial services industry
- Strong working knowledge of Linux and Windows systems
- Proficient understanding of high availability technologies in databases
- Proficient in writing and optimizing SQL statements
- Proficient in writing Shell scripts
- Proficient understanding of DB tuning
- Strong experience in MySQL/MariaDB (both on premises and AWS RDS versions including Aurora)
- Experience in MSSQL (Both on premises and on Azure SQL) is a strong plus
- Experience in PostgreSQL, AWS Redshift, MongoDB will be considered an advantage
- Strong troubleshooting skills
- Ability to identify areas that need proactive updates, improved security and planned maintenance
- Ability to communicate effectively

Benefit from:

- Attractive remuneration package plus performance related reward

- Private health insurance
- Corporate pension fund
- Intellectually stimulating work environment
- Continuous personal development and international training opportunities

Type of employment: Full time
