

## Junior Java Developers – Cyprus, Greece

**Reference Number: JJD1021**

### **The Role:**

This is a great opportunity for you to work in a technology-driven environment in close collaboration with skilled and passionate professionals who utilize the best practices and cutting-edge technologies. As a junior developer you will get every chance to share your opinions and grow professionally. You will work on challenging projects that involve processing large amounts of data and scalable microservices. Our technical stack includes, but is not limited to; AWS Cloud Services, Containers, and both Relational and Non-Relational Databases.

### **The main responsibilities of the position include:**

- Develop software programs and utilities used within the operational backbone of the company
- Recommend new technologies and software upgrades for existing systems
- Be involved in the full software development life-cycle of new systems
- Be in direct contact with the business and actual users of our systems

### **Main requirements:**

- BSc/MSc in Computer Science, Engineering, or in a related degree
- Good understanding of algorithmic complexity, data structures
- Proactive with an ability to take initiative
- Good knowledge of Java 8+
- Team player
- Problem solver and critical thinker
- Passionate about the field of technology

### **The following will be considered an advantage:**

- Knowledge of AWS Cloud Services
- Experience with CRM systems
- Experience with any major RDBMS

**Benefit from:**

- Attractive remuneration package
- Private health insurance
- Intellectually stimulating work environment
- Continuous personal development and international training opportunities

Type of employment: Full time

Location: Cyprus/ Greece
