Front End Developer Angular

The Role

Our Technology Department supports and drives the digital transformation of the Akelius business in seven countries worldwide

As a Front End Developer Angular you will be working in a very fast pace work environment. Your duties will include amongst others developing web applications and the design of features and applications. You will collaborate with your team members in an agile environment

Requirements

- Masters/Undergraduate Degree in Computer Science, Engineer or in a related field
- A minimum of 3 years of experience in front end development
- Experience in responsive design, cross-browser development is a strong advantage
- Good knowledge of Angular latest versions and Typescript
- Strong knowledge of CSS, Less and Sass, design patterns and libraries
- Proficiency in spoken and written English
- Knowledge of any other language, including the German language will be considered an advantage (but not a prerequisite)
- Positivity, professional maturity, enthusiasm and team spirit
- Creativity and an out-of-the-box thinking approach
- Passion for delivering outstanding customer experiences
- Desire to excel and stand out professionally

What we offer

- Office in central locations
- International training program
- Internal promotion prospects
- Health and keep-fit allowance
- Fruit and refreshments in the office
- Up to 36 months unpaid parental leave

Are you ready for the next step?

If so, here is what you need to do…
