

DevOps Engineer

Are you curious, motivated, and forward-thinking? At FIS you'll have the opportunity to work on some of the most challenging and relevant issues in financial services and technology. Our talented people empower us, and we believe in being part of a team that is open, collaborative, entrepreneurial, passionate and above all fun.

About the team:

PRIME DevOps is the team responsible for our CLOUD implementations. The team provides and manages both the infrastructure and the surrounding automation required for our applications to operate in the cloud. It works closely not only with other internal teams but with existing and potential clients, ensuring a smooth onboarding process.

What you will be doing:

Along with the rest of the DevOps team, you will be responsible to maintain and enhance our architecture and define the roadmap and operations of the DevOps team in relation to automation, Kubernetes, Kafka and other related technologies for our development and client production infrastructure. You will work on building, scaling, and monitoring such services in relation to our applications (PRIME) and making our infrastructure highly available.

The key responsibilities of the role will be:

- Automate new requests
- Support our existing CLOUD infrastructure (EKS / MSK / S3 / EC2)
- Support and enhance our existing framework stack (automation, pipelines)
- Support our existing CLOUD implementations and be part of the new launches
- Support our internal application teams as well our clients

What you bring:

- Bachelor's degree in Computer Science or a related area
- Basic understanding of cloud computing (preferably AWS)
- Basic understanding of RestAPIs
- Hands-on experience with the following:
- GIT (either Bitbucket or GitHub)
- Shell scripting (Bash and/or PowerShell)

Added bonus if you have:

- 1+ year in DevOps or application development role
- Knowledge of containerization like Kubernetes, Docker
- Kafka
- Basic understanding of the TLS setup
- Jenkins pipelines / Groovy
- AWS CLI
- AWS Cloud Practitioner or AWS Solutions Architect or Certified Kubernetes Application Developer (CKAD) or Certified Kubernetes Administrator (CKA)
- Knowledge of Infrastructure as Code with terraform / CloudFormation.

What we offer you:

- A work environment built on collaboration, flexibility and respect
- Varied and challenging work to help you grow your skillset
- Competitive salary and attractive range of benefits designed to help support your lifestyle and wellbeing, including:
 - Private medical insurance for you and your family, non-contributory, in and out patient cover
 - A well-established, strong provident fund
 - Life insurance (3x base salary)
 - 21 days' holiday increasing with length of service, plus public / bank holidays
 - Flexible working (hybrid model – part from home, part from office)
 - Wellbeing initiatives with access to support services
 - Modern offices opposite the Mall of Cyprus with gym and showers, games room (pool table, table tennis, darts, table football, PlayStation) and prayer/meditation room
 - Store discounts
 - Regular social events and charitable initiatives to give back to our community.

FIS is committed to providing its employees with an exciting career opportunity and competitive compensation. The pay range for this full-time position is **EUR 27,550.00 – EUR 36,000.00** and reflects the minimum and maximum target for new hire salaries for this position based on the posted role, level, and location. Within the range, actual individual starting pay is determined by additional factors, including job-related skills, experience, and relevant education or training. Any changes in work location will also impact actual individual starting pay. Please consult with your recruiter about the specific salary range for your preferred location during the hiring process.

To apply for this position, please visit our website <https://careers.fisglobal.com> and apply through the online system. All applications will be treated in the strictest confidence.
