aws re/start

AWS re/Start for Success

Preparing individuals for entry-level cloud roles in operations, site reliability, and infrastructure support

AWS-trained individuals are ready to fill in-demand cloud roles

What is AWS re/Start?

AWS re/Start is a full-time, classroom-based development and training program that prepares individuals for entry-level cloud positions. After 12 weeks of training, collaborating organizations connect AWS re/Start program graduates with potential employers.

"… 2-3 months into the job we had [our AWS re/Start graduates] working on production tasks and production workloads … [T]hey were fully contributing members of the team."

Christopher Livermore
Head of Operations at Hive Home

aws re/start

AWS re/Start Graduate Profile

Trained in AWS Cloud fundamentals

Prepared to pursue AWS Cloud Practitioner certification

Ready to connect with employers

What training do AWS re/Start learners complete?

Each diverse cohort of learners, supported by professional mentors and accredited trainers, completes cloud training featuring scenario-based learning, hands-on labs, and coursework. Learners also focus on topics such as adaptive communication, time management, and collaboration.

What are ideal roles for AWS re/Start graduates?

AWS re/Start graduates pursue entry-level cloud roles in operations, site reliability, and infrastructure support. In these positions, graduates use Python scripts, support Linux operating systems, operate network infrastructures, deploy basic AWS core services, and carry out initial troubleshooting.

How can you get involved with AWS re/Start?

As a potential employer, you can get involved by observing classes, speaking to a cohort, meeting with potential candidates, and participating in local events. Fill out an interest form at the AWS re/Start website listed below.
